

# Configuring the Trusted Sites Zone

## Adding AXIS and Angus to the Trusted Sites Zone:

PC users who regularly visit a group of safe pages can add these sites to the Trusted Zone while maintaining more stringent security for the rest of the Internet. This allows ActiveX, pop-ups, and scripting to be available for the chosen sites but not for the Internet as a whole.

Increasing the security for the Internet security zone of Internet Explorer may break some reputable sites that you use regularly . The solution is to add these sites to the Trusted zone, which will restore their functionality.

1. Launch **Internet Explorer**. Click the **Tools** menu, and then click **Internet Options**. The Internet Options dialog box appears.
2. Click on the **Privacy** Tab.
3. Click on the **Sites** Button.
4. The **Per Site Privacy Actions** dialog box appears. Type the address "**angusanywhere.com**" and "**axisportal.com**" (one at a time) into the **Address of website** field, click **Allow**, and then click **OK** to exit the Per Site Privacy Actions dialog box.
5. On the **Internet Options** dialog box, under the **Privacy** tab under the **Pop-Up Blocker** settings, click the **Settings** button.
6. The **Pop-up Blocker Settings** dialog box appears. Type the address "**\*.axisportal.com**", "**\*.cp.axisportal.com**", "**\*.angusanywhere.com**", and "**\*.ng1.angusanywhere.com**" (one at a time and don't forget the asterisk\*) into the **Address of website** to allow field, click **Add** , and then click **Close** to exit the Pop-up Blocker Settings dialog box.
7. In the **Internet Options** dialog box, Click the **Security** Tab.
8. Click on the **Trusted Sites** Icon, and then Click the **Sites** button.
9. The **Trusted Sites** dialog box appears. You need to add the addresses to the Website list
  - a. Type the address "**http://\*.axisportal.com**" into the Add this website to the zone field, click **Add**
  - b. Type the address "**http://\*.cp.axisportal.com**" into the Add this website to the zone field, click **Add**
  - c. Type the address "**http://\*.ng1.angusanywhere.com**" into the Add this website to the zone field, click **Add**
  - d. Type the address "**http://\*.angusanywhere.com**" into the Add this website to the zone field, click **Add**
10. Then click **Close** to exit the Trusted Sites dialog box.
11. Click **Apply** and **OK** to exit the Internet Options dialog box.

Restart your computer and retry the lost function.
