

# Outstanding Inspections

[Control Panel](#) > [Work Order](#) > [Property Inspections](#) > [Outstanding](#)

The Outstanding list displays a summary of all inspections generated by schedules that have not been marked as completed.

An inspection can be assigned or reassigned by selecting it from the list and clicking **Assign**. This will open Assign Inspection popup.

In the Assign Inspection popup, you can select an employee to assign or reassign the inspection to, and update the **Expected Completion Date**.
