Setting Up Your Printer

Setting Up Your Printer:

If your security team will need to print visitor badges for your visitors, your printer(s) will need to be setup accordingly. The two printers officially supported by Angus AnyWhere are the **Dymo LabelWriter** and **BOCA** printers.

For information on how to configure the Dymo LabelWriter printer, see Configuring the Dymo LabelWriter Printer.

For information on how to configure the BOCA printer, see Configuring the BOCA Printer.
