

Emergency Communication

[Control Panel](#) > [Communication](#) > [Emergency Communication](#)

About Emergency Communication:

Emergency Communication is a building safety tool to keep all building personnel informed of arising threats, emergency contact information, building emergency procedures, and weather tracking information. As threats arise, Property Managers have the option to create pop-up notifications that display on the portal.

A screenshot of the 'Emergency Communication' portal page. The page features a red cross icon and the title 'Emergency Communication'. It includes an 'Email This Page' link and a 'PROPERTY TEAM' sidebar with contact information for CHUCK LIEDMAN, JOEY FORD, and DAISY CASER. The main content area is divided into 'UPDATES' and 'EMERGENCY CONTACTS'.
