

Area Amenities Map

About Area Amenities Map:

The **Area Amenities Map** gives you the option to consolidate all of the groups and listings into a single interactive page utilizing a Bing map to visually display the listings' locations relative to the property.

Note:

- The classic **Area Information** format lays out the various groups and its listings on separate pages along with a stock photo or property image. When the **Area Amenities Map** is enabled, the images associated with each group will be disabled (not deleted) in order to make room for the map. The transition from the map view to the classic view or vice versa is seamless and does not require re-uploading images or listings.
