

Microsoft Edge Settings

Microsoft Edge Settings:

In order for the Angus AnyWhere modules to function properly within Axis Portal, pop-ups and cookies must be enabled. Refer to the subsections below for additional details.

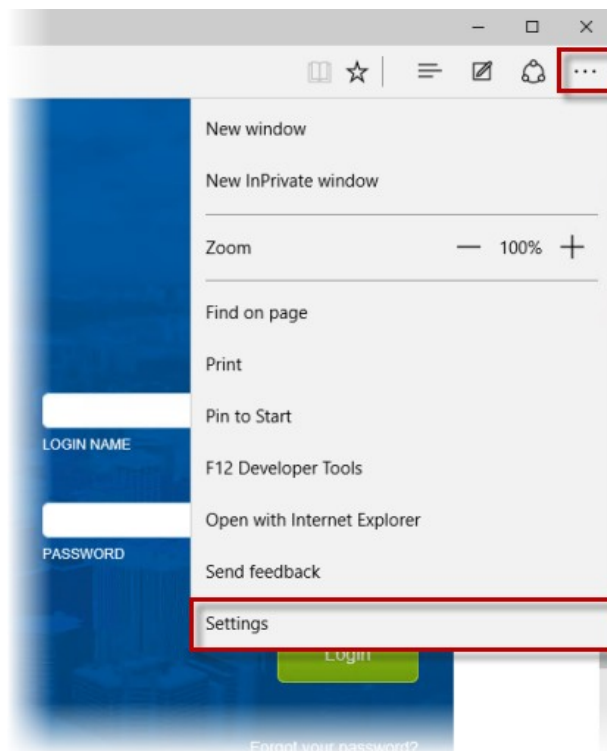

Enabling Pop-Ups:

As described below, there are two methods available to enable pop-ups: enabling pop-ups for all websites, and enabling pop-ups for Angus AnyWhere only.

Enabling pop-ups for all websites

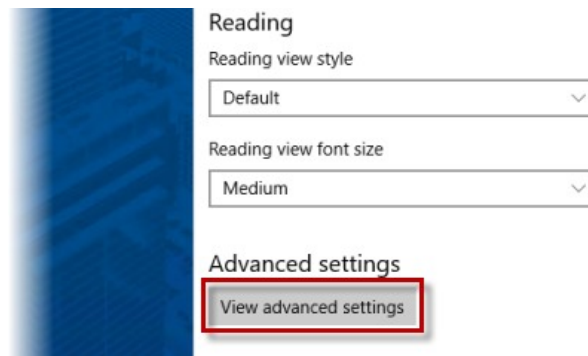

This is currently the only way in Edge to enable pop-ups before accessing the website. It has the drawback of enabling popups for all websites.

1. Click on the **More Actions** (...) menu icon in the top-right corner of the Edge browser window, and select **Settings**.

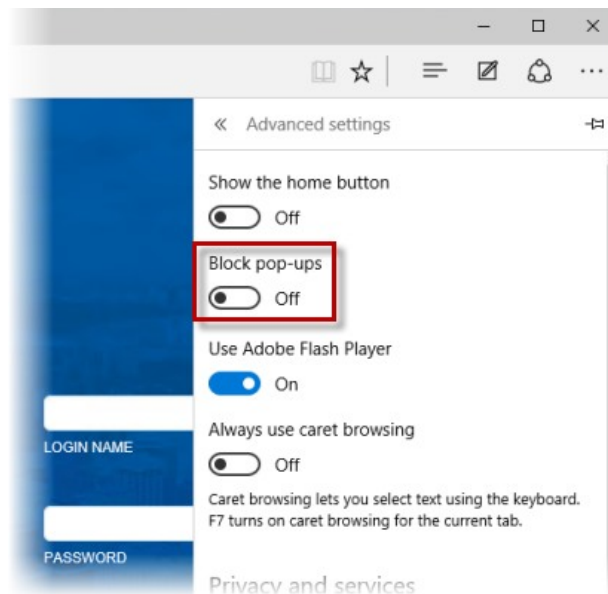

2. At the bottom of the **Options** menu, click **View Advanced Settings**.

3. In the **Advanced Settings** menu, turn **Block pop-ups** off. This change is automatically saved. You can exit the menu by clicking anywhere on the browser window.

Enabling pop-ups for Angus AnyWhere only

Currently, the only way to enable pop-ups for a specific website in Edge is to wait until a pop-up needs to be opened, at which point Edge will display a message at the bottom of your window indicating that a pop-up was blocked. When you see this message, click **Always Allow**.

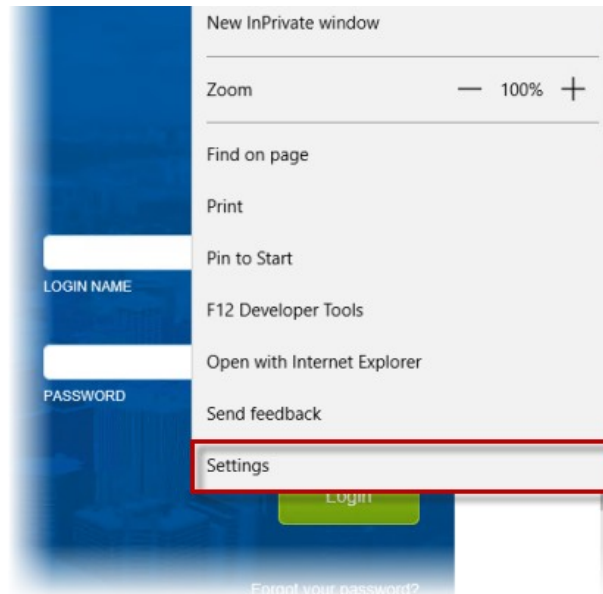

Enabling Cookies:

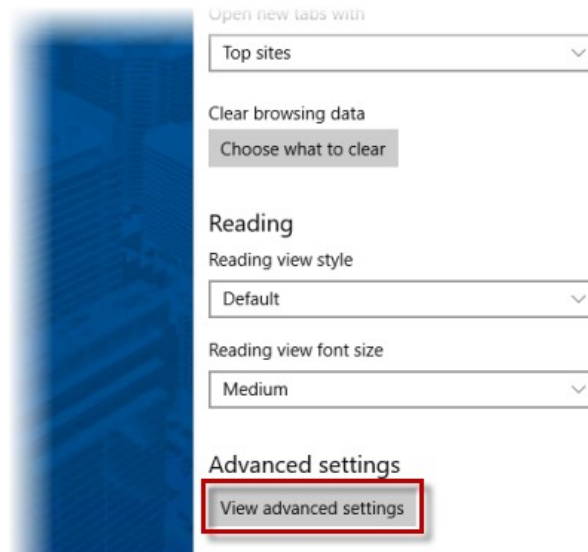

If cookies are not enabled, you will be unable to view the Angus AnyWhere modules in Axis Portal. Follow the steps below to enable cookies:

1. Click on the **More Actions (...)** menu icon in the top-right corner of the Edge browser window, and select **Settings**.

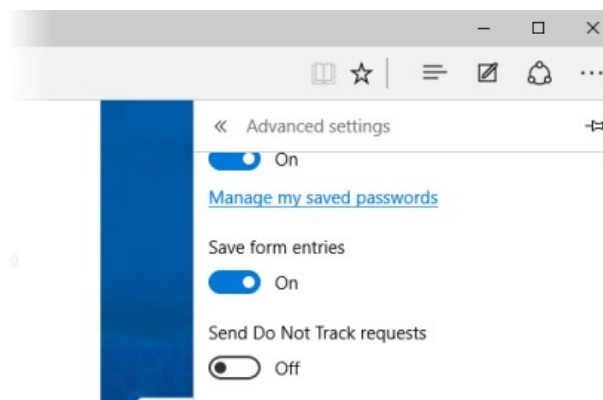

2. At the bottom of the **Options** menu, click **View Advanced Settings**.

3. In the **Advanced Settings** menu, scroll down until you find the **Cookies** subsection. In the dropdown menu provided, select **Block only third party cookies** (recommended), or **Don't block cookies**. This change is automatically saved. You can exit the menu by clicking anywhere on the browser window.
