

Create Custom Handbook Theme

1. Click [Control Panel > Content Manager > Handbooks](#)
2. Click **Add** under the *Custom Handbook Themes* section.

3. Add a **Theme Name**.
4. Customize settings for **Theme, Header Text, Body Context Text, and Links**. A quick preview of the applied setting is displayed on the right.

Note:

- If you wish to have additional font styles that would better suite your Property's theme, contact your AXIS representative to have them added.
5. Click **Submit**. The new theme will now be available to apply to new and existing handbooks under the Attributes tab.
